

Shock – modern clinical treatment concepts

Prof. Dr. Heinrich Volker Groesdonk and Prof. Dr. Matthias Heringlake

UNI-MED Science, 1st edition 2021, 80 pp, 13 illustrations, Hardcover, ISBN 978-3-8374-1598-8, Euro 29,80

Patients in shock represent a major challenge in daily acute medical care. Therefore, a basic understanding of its pathophysiology and resulting pharmacology is necessary in order to treat these critically ill patients in a targeted manner and thus to ensure high-quality care. The aim of this textbook is to present this understanding in a didactically helpful and technically up-to-date state, taking into account the scientific evidence and conveying modern therapy concepts that can be used in everyday practice.
